<b>Mar 12</b>	-Meeting with Governor for partner update and decisions		

---

## **State Broadband Data & Development Program**

### **(Data, Mapping & Planning) (via NTIA)**

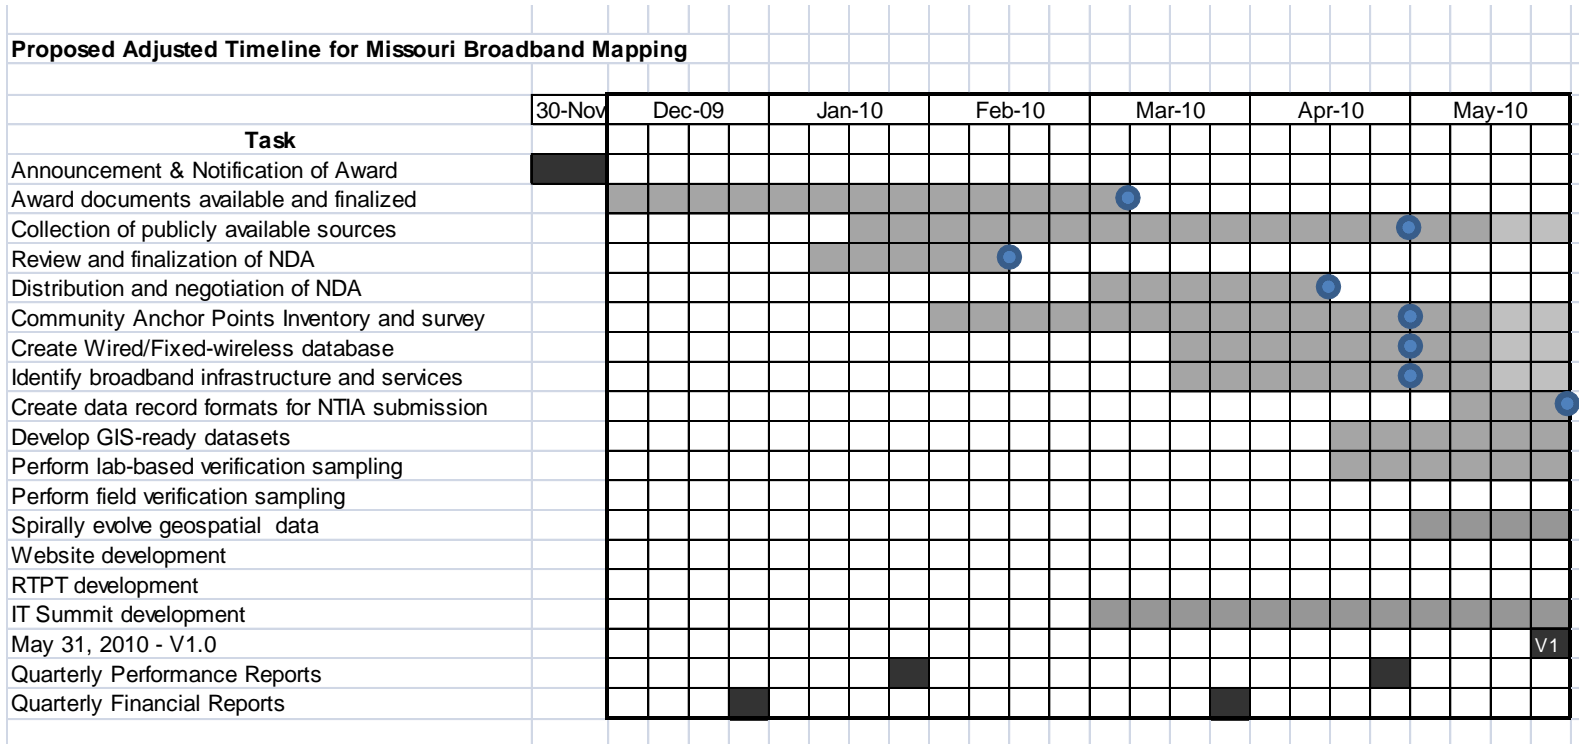

<b>July 1, 2009</b>	-NTIA announces State Broadband Data and Development Grant Program (a competitive, merit-based matching grant program available to each state and territory) via a NOFA
<b>July 14 – Aug 14</b>	-Applications were accepted
<b>Aug 14</b>	-Missouri submits proposal and it was accepted by NTIA
<b>Nov 1</b>	-A ‘substantially complete’ version of the database was due  -In the state’s proposal, it was stated that Missouri could not meet this deadline, but a delivery date of Feb 1, 2010 instead for the first version of the substantially complete database. (This was predicated on an award notification of early September. With the award date now essentially Dec 1 all these dates have shifted and a new timeline is being created. Missouri is still striving for a 6-9 month push to develop the first version of this data.)
<b>Nov 30</b>	-Missouri received notification of award to the Missouri Office of Administration (award number: 29-50-M09022) (federal share = \$1,973,382, with Missouri sharing cost = \$493,346)
<b>Mar 1, 2010</b>	-Missouri submitted a request for an extension to May 31, 2010 for the first version of the statewide map to NTIA
<b>Mar 16</b>	-Missouri was granted the requested extension to May 31, 2010 for version one of the statewide broadband map and all other deliverables
<b>2010 – 2011</b>	-See below for a new projected timeline of data collection, mapping and planning activities, along with expected deadlines
<b>Feb 17, 2011</b>	-Final data/map is due to be posted to the Federal government’s mapping website

# State Broadband Data & Development Program
